Products: Residential

100 Amp Single-Phase
200 Amp Single-Phase

Products: Commercial

200 Amp Three-Phase
400 Amp Three-Phase

recently reported that 40-60% of your power cost comes from heating and cooling. That's HALF your power bill. By focusing on those large energy-consuming motors on your residential or commercial property, we can *significantly* reduce your kilowatt consumption.

Our *Green Power Factor* unit is designed to lower your electric bill and increase the life of your appliances and motors by making everything much more efficient.

- SAVE up to 25% on power bills
- Safeguard your equipment against power surges (up to 2000 joules of heat)
- 20-year warranty on workmanship & product defects
- All products UL & CuL listed
- 25-year product life expectancy
- Protects against power surges & brownouts! (surge suppression up to 2000 joules)
- Works on 220 and 240 volt AC applications. Internationally, it works on 110 volts also, with no conversions needed.
- 50/60 Hertz
- Rain-proof product works on indoor or outdoor installation
Box rating – Nema 3R Rated (Metal)

Our Green Power Factor products WILL save you money!

They help make motors and appliances more energy-efficient by **up to 25 percent!** Just as you can replace your refrigerator with a new, more efficient model, you can also make everything you own as energy-efficient as possible, so you use *much* less electricity. As a side benefit, by making your products run cooler and more efficiently, you *significantly* extend their lifespan.

Yet another amazing benefit – our *Green Power Factor* unit also **doubles as a surge protector** to keep everything much safer, offering protection from power surges & spikes.
